```
Advent of Code
--- Day 1: Report Repair ---
on without you.
The tropical island has its own currency and is entirely cash-only. The
gold coins used there have a little picture of a starfish; the locals just
call them stars. None of the currency exchanges seem to have heard of them,
To save your vacation, you need to get all fifty stars by December 25th.
Collect stars by solving puzzles. Two puzzles will be made available on
complete the first. Each puzzle grants one star. Good luck!
Before you leave, the Elves in accounting just need you to fix your expense
report (your puzzle input); apparently, something isn't quite adding up.
Specifically, they need you to find the two entries that sum to 2020 and
then multiply those two numbers together.
For example, suppose your expense report contained the following:
1721
299
```

Our sponsors help make Advent of Code possible:

SmartyStreets - -- Ridiculously ---- Fast ----- Address ---- Verification ---- AND ------ Rooftop ----- Geocoding ---

675

1456

In this list, the two entries that sum to 2020 are 1721 and 299. Multiplying them together produces $1721 \times 299 = 514579$, so the correct answer is 514579.

Of course, your expense report is much larger. Find the two entries that sum to $\overline{2020}$; what do you get if you multiply them together?

Your puzzle answer was 876459.

The first half of this puzzle is complete! It provides one gold star: *

--- Part Two ---

The Elves in accounting are thankful for your help; one of them even offers you a starfish coin they had left over from a past vacation. They offer you a second one if you can find three numbers in your expense report that meet the same criteria.

Using the above example again, the three entries that sum to 2020 are 979, 366, and 675. Multiplying them together produces the answer, 241861950.

In your expense report, what is the product of the three entries that sum to 2020?

Answer: [Submit]

Although it hasn't changed, you can still get your puzzle input.
